

FARHAN MAULANA

Personal Data

Date of Birth : 10 June 2002
Nationality : Indonesia
Marital Status : Single
Gender : Male
Religion : Islam
Postal Address : Jagakarsa, Jakarta Selatan
Phone : +62 83845420795
Email : fm504968@gmail.com

Educational Qualification

Bachelor's Degree at Universitas Putra Indonesia "YPTK" Padang, Majoring in
Information System
GPA 3.37 (2022 – 2026)

Technical Qualification

Programming/Coding Languages

- PHP
- Javascript
- HTML
- CSS
- SQL

Platform / Operating

- Windows
- Linux (Basic)

Framework

- React Native
- React.js
- Bootstrap

Development Tools

- Visual Studio Code
- Cursor
- XAMPP
- Postman

Application

- Microsoft Word
- Microsoft Excel
- Microsoft Power Point
- Figma
- MYSQL
- Firebase
- Cloudinary
- Wireshark

Work Assignments

1. February 2025 – June 2025, as Intern (Application and Informatics Division) at Dinas Komunikasi, Informatika dan Statistik Provinsi Sumatera Barat

Job Description:

- Assist in developing website interface designs using Figma.
- Provide regular progress reports to field internship supervisors.
- Test website appearance on various devices and browsers.
- Provide feedback on website design and usability.

Skill: Figma, UI/UX Design, Website Development, Team Collaboration, Problem Solving.

Project Specification:

- Designed website user interface (UI) mockups using Figma based on project requirements.
- Collaborated with internship supervisors to improve website layout and usability.
- Conducted interface testing to ensure responsive display across multiple devices.
- Presented project progress and design improvements during weekly internship evaluations.

Projects

1. 2025 – Website Interface Design for Government Institution

Description

Designed website interface prototypes using Figma during an internship at the Department of Communication, Informatics, and Statistics of West Sumatra Province. Focused on improving layout consistency, usability, and responsive design.

2. Final Project | 2025 – 2026 Web-Based Patient Registration and Queue Information System

Description

Designed and developed a web-based patient registration and queue management information system for Puskesmas Sijunjung to improve service efficiency. The system enables patient registration, queue management, and administrative monitoring through a structured software development process using the Waterfall methodology. The project was later published in the Jurnal Sains Informatika Terapan (JSIT).

Skill: PHP, MySQL, JavaScript, HTML, CSS, SDLC Waterfall, System Analysis

Trainings

1. Huawei ICT Academy (2025).

Algorithm and Program Design

- Learned fundamental programming concepts and algorithm design.
- Applied problem-solving techniques using flowcharts and pseudocode.
- Developed logical thinking for software development.
- Successfully completed the training program and final examination.

2. Huawei ICT Academy (2025).

Python Programming Basics

- Learned Python syntax, variables, data types, operators, and control structures.
- Developed basic Python programs using functions and loops.
- Practiced solving programming problems with Python.
- Successfully completed the training program and final examination.

3. Huawei ICT Academy (2025).
HCIP-Datacom Core Technology
 - Learned enterprise network architecture and IP networking concepts.
 - Studied routing, switching, VLAN, and network protocols.
 - Understood network deployment and troubleshooting fundamentals.
 - Successfully completed the training program and final examination.

Experiences

1. Internship at Dinas Komunikasi, Informatika dan Statistik Provinsi Sumatera Barat (2025)
2. UI Design Project using Figma (2025)
3. Academic Software Development Project (2025)

Certification

1. Huawei ICT Academy Certification – Huawei (2025)
2. Certificate of Internship – Dinas Komunikasi, Informatika dan Statistik Provinsi Sumatera Barat (2025)
